

FOREST ROW PARISH COUNCIL

POLICY ON STREETLIGHTING

In view of the number of requests recently received from residents asking for particular types of lighting, it was agreed to formulate a policy with regard to new or replacement lights. The following wording was agreed:

- All new lighting shall be of high pressure sodium type – SRL8 70watt SON or equivalent - to ensure efficient lighting both in terms of energy efficiency and maintenance
- This is in accordance with consideration of lower light emissions as detailed in the East Sussex County Council Street Lighting Policy 2004
- Lights will only be replaced as part of an upgrade or when the light is deemed to be beyond economic repair

APPROVED 12th MAY 2009
